Personal statement.   Sean Gordon

As a skilled and versatile UI designer, I leverage my creative background to deliver eye-catching, responsive interface designs that precisely match clients' requirements. Additionally, I can produce high-quality icons, illustrations, typography, branding and artwork on-demand.

I have been involved in a number of projects from planning to launch and understand that a deep product knowledge and awareness of the development process are vital to my role.

Just as I am committed to continuously expanding my traditional graphic design skillset, I constantly work to improve my software development skills and currently utilize a functional understanding of HTML, CSS, and JS to bring a wider range of technical skills to any project.

Recent work.

BonnieKali (Basel, Switzerland) Feb 2023 - current.
Responsive proof-of-concept for a future-proof fitness tracking app.
Tools: Figma, Adobe Ai, Adobe Ps, Github, HTML, CSS, JS.
